

## Overseas internship in ecologically oriented agriculture in Senegal

The Association for AgriCulture & Ecology (Agrecol e.V.) in Germany offers internship placements and travel grants for students enrolled in universities and colleges in German-speaking countries. For this year (2026), the Association can arrange one internship placement in ecologically oriented agriculture with its partner organisation **Agrecol Afrique in Thiès, Senegal**.

The internship offers students an opportunity to acquire practical knowledge in sustainable agriculture, agroecology and land management in the Global South. By living and working in another sociocultural environment, students can also gain valuable intercultural experiences.

The Agrecol Association in Germany covers the travel costs for a **round-trip flight** between Europe and Senegal.

Further information about the internship programme and the requirements can be found in the announcement on the Association's homepage:  
<https://agrecol.de/praktikantenprogramm/>.

The application, consisting of a convincing letter of motivation, concrete details about the desired period of internship and a curriculum vitae, should be sent in French and German by email as **one pdf file** to [praktikantinnenprogramm@agrecol.de](mailto:praktikantinnenprogramm@agrecol.de) and [tamina.felder@agrecol.de](mailto:tamina.felder@agrecol.de) (Tamina Felder).

Further questions regarding the internship can be directed to [praktikantinnenprogramm@agrecol.de](mailto:praktikantinnenprogramm@agrecol.de) or [tamina.felder@agrecol.de](mailto:tamina.felder@agrecol.de).

**The deadline for applications is 8<sup>th</sup> of February 2026.**
